This dude has some great ranking in the breed. Top 4% REA, top 7% HPG, top 13% TM. We thought enough of him to use him on registered cows for cleanup. His mother is a perfect cow, and his grandmother is still our favorite female. This is a herd sire that offers females, performance and carcass quality.		<b>Maternal &amp; Reproductive</b>

Probably our top pick for this years offering on total eye appeal! This bull is in the top 9% CED and top 14% stayability in the breed and has a mother with an mppa of 103.1. Amazing for a 10 year old cow. An absolutely perfect bull with highest praise for his mother. This bull was a twin to a bull that coyotes got hold of at calving. We saved him, minus a last rib and big divot in his side—had to make him a steer. Any coyote hunters out there...?		<b>Maternal &amp; Reproductive</b>

LCC Princess K1275

KCC Cherokee Strip 804-643

### KCC Miss Cherokee 889

KCC Ms Total Proof 2107-445

Here is a really nicely made heifer bull that is in the top 10% of the breed for calving ease. He also has great carcass numbers. Again, a bull out of a first calf heifer, so only 3 stars for females, but with the job she did this year, he will definitely be a contender. We love the Wellington calves, they have really performed well for us.

Sakic is a Canadian bred bull with beautiful type and females. We bred him to one of our best cow families and here is the moderate package proof. The Canadians do not set the same emphasis on carcass as we do, but if you are selling calves at weaning or as yearlings, or more importantly, want some great females. Here he is. You can bring carcass in with other bulls but you need good 'doing' cattle that are sound first.

Scrotal yearling 34

A very nice heifer bull that is in the top 20% in every trait! He has great capacity in a very moderate package. He was born a twin to a heifer, on a first calf heifer. Not the greatest way to start life! Coming off of test in March really hurt the older bulls yearling weights, but as his YW epd indicates, he has good growth! Chateau brings calving ease through shortened gestation length, a great way to get calving ease and still maintain growth.
